- 6) Online Flashcards (Lessons 9-13)
- 7) Online Multiple-choice quizzes for Lessons 9-13 (in addition to the CME credit exams)
- 8) One 1 hour Personalized One-On-One Session with one of our instructors at a mutually agreed date and time.

Program Design

This Premium Package is composed of 5 Video Tutorials (Lessons 9-13). Since you will be receiving the book and corresponding audio USB, you can review any/all Beginner-Intermediate levels 1-8 in the book & audio USB. As mentioned, Lessons 9-13 (Advanced level) include the Guided Video Tutorials.

You will learn:

- Advanced grammar concepts
- More complex Verb Conjugations
- All Verb Tenses and Conjugations of the Subjunctive Mood
- Guided video tutorials of dialogues based on the grammar and verb conjugations presented in each of Lessons 9-13, such as, Abdominal Pain, STIs, a Childbirth, Post-Partum visit, High Blood Pressure, Diabetes, Birth Control, as well as COVID-19 vocabulary and phrases. Dialogues, vocabulary and common phrases based on a Rape Victim, Emergency Room car accident patient, Sports Medicine patient, Physical and Occupational Therapy, a Burn Victim, a patient regaining consciousness, Womens' Health, a Myocardial Infarction/Cerebrovascular Thrombosis, Pattern for Growth and Development, Psychology & Psychiatry, and Child Behavioral Problems and many more are found in Lesson 14 of the book and audio USB.
- How to intervene with medical emergencies in Spanish.
- How to educate and encourage preventive care and wellness visits which culturally resonate with Latino patients.
- To achieve a higher degree of cultural sensitivity and competency leading to a stronger healthcare provider/patient bond, improved communication, and a higher level of healthcare compliance.

In addition, cultural norms and competencies are covered throughout the book

Each lesson follows a logical progression by introducing preliminary vocabulary and is followed by related exercises, practice dialogue(s) and a crossword puzzle. Thus, the dialogues are based on vocabulary that has initially been presented. Grammar concepts are explained in a simple, clear, and concise manner.

The **Guided Video Tutorials** here provide audio explanations of grammar, medical terms and dialogues accompanied by written text allowing you to follow along with ease. After each lesson in the Guided Video Tutorial, you can practice with the flashcards and multiple-choice quizzes. In addition, each lesson is followed by a CME credit exam, which, you can complete at your own pace.

You have access to 7 exams. Each exam is accredited for 3 AMA category 1 CME credits. By completing all 7, you can obtain 21 category 1 AMA CME credits. Your certificate will be emailed after your exams are reviewed/ graded.

How to use this course

- 1. Work through the chapters in consecutive order.**
- 2. Complete the progressive exercises.** For example, they start with reinforcing grammar concepts then eventually challenge your cognitive thinking.
- 3. Memorize the terms relevant to your specific field.** The vocabulary lists have been carefully selected to correspond to common healthcare-related conversations.
- 4. Maximize the dialogue sections by using this technique –**
 - a) Start by watching the Guided Video Tutorial from the beginning, one section at a time. Don't take things too fast, only to discover that you have not fully assimilated the material.
 - b) When you arrive at a dialogue in the Guided Video Tutorial, having first memorized the vocabulary, read and/or listen to it as many times as you need. Then, listen to the dialogue while reading along simultaneously. The first few times, just attempt to obtain the general idea. Do not focus on each separate word (just as you don't concentrate on every word uttered by an announcer when listening to a radio in English); rather, try to "catch" the key phrases.
 - c) Repeat words and phrases aloud as much as possible to reinforce the structures and to mimic the accent and intonation. Subsequently, just listen to the dialogue on the Guided Video Tutorial.
 - d) All the lessons in the Guided Video Tutorial can also be found in more detail in the book. The Audio USB is an additional learning tool you can listen to during your free time while driving, exercising, cooking, cleaning, etc. It is a wonderful tool to reinforce all the content covered in the Video Tutorial as well as the book.
 - e) Repeat words and phrases aloud to reinforce the structures and to mimic the accent and intonation. The more you listen to the recordings, the more you will improve.
 - f) To facilitate your learning, you can use the English translation portion of the textbook (Appendix B) to translate the dialogues. For easy reference, a verb table is also provided in Appendix A, listing the different verb tense endings and conjugations.

Although there are various medical dialogue references, they offer an example of how to structure sentences. The goal is to help you assemble the sentence structures that suit your specific needs rather than cover exchanges from every field.

The purpose of this program is to teach you to communicate with your Spanish-speaking patients to form strong clinician–patient rapport. This Guided Video Tutorial's objective is not to include dialogues of every field to memorize, but to teach the sentence structures needed to form your own dialogues, to suit your own specific needs.

If a word, dialogue, or concept related to your specific field is not mentioned, simply learn to use the sentence structure, and add your own specialized term. In this way, you will learn how to say whatever you need to.

5. Remember, you can review the Guided Video Tutorial or read the book and play the Audio USB as often as you need. Regular review is key! It won't be long until you realize how much medical Spanish you've learned.

We encourage you to schedule your Personalized One-On-One session with one of our instructors, which you can do at a mutually agreeable date and time.

Please remember to contact us with any questions or concerns throughout your learning journey. We are always happy to help! That's what we're here for!

Good luck! ¡Buena suerte!

Cordially,

The Ríos Associates team
